

| <b>Main classification</b> | <b>Condition to treat</b>  | <b>Machine to use</b> |
|----------------------------|--|-----------------------|
| Vascular                   | Angiogenesis   | CellSonic VIPP        |
| Urology                    | Kidney stone removal   | Lithosplit            |
|                            | Kidney failure   | CellSonic VIPP        |
|                            | Urine flow   | digiFLOW              |
|                            | Erectile dysfunction   | CellSonic VIPP        |
|                            | Peyronies disease  | CellSonic VIPP        |
| Orthopaedics               | Non-union fracture   | CellSonic VIPP        |
|                            | Fractures  | CellSonic VIPP        |
|                            | Osteonecrosis  | CellSonic VIPP        |
| Podiatry                   | Diabetic foot ulcer  | CellSonic VIPP        |
|                            | Toe nail fungus  | CellSonic VIPP        |
|                            | Heel spur  | CellSonic VIPP        |
|                            | Plantar fasciitis  | CellSonic VIPP        |
|                            | Gout   | CellSonic VIPP        |
| Physiotherapy              | Tennis elbow   | CellSonic VIPP        |
|                            | Frozen shoulder  | CellSonic VIPP        |
|                            | Achilles tendons   | CellSonic VIPP        |
|                            | Lower back pain  | CellSonic VIPP        |
| Sports medicine            | Muscle enhancement   | CellSonic VIPP        |
|                            | Sprains  | CellSonic VIPP        |
| Dermatology                | Healing all wounds including non-healing wounds and gangrene<br>Arterial (ischemic ulcer)<br>Venous/varicose veins<br>Neurotropic (Diabetic)<br>Traumatic wounds including burn<br>Infected ulcer(viral, bacterial, fungal, parasite) e.g. chronic TB, Leprosy, Buruli<br>Inflammatory ulcer (various Rheumatology illness, lupus)<br>Tumour /benign and malignant | CellSonic VIPP        |
|                            | Psoriasis - release from itching and skin eruptions  | CellSonic VIPP        |
|                            | Aesthetics - Cellulite removal   | CellSonic VIPP        |
|                            | Fat removal  | SHAPE machine         |
|                            | Wrinkle reduction  | TIME machine          |
|                            | Stretch marks  | CellSufflator         |
|                            | Plastic surgery - scar removal   | CellSonic VIPP        |
| Dental                     | Caries   | CellSploder           |
|                            | Periodontal disease  | CellSonic VIPP        |
|                            | Osteonecrosis of the mandible  | CellSonic VIPP        |
| Pain removal               | Damaged nerves including spinal cord   | CellSonic VIPP        |
| Veterinary                 | Equine   | CellSonic VIPP        |
|                            | Domestic animals   | CellSonic VIPP        |
| Surgery                    | Light source   | CLL 150               |
|                            | Insufflator  | digiCARB4             |
| Diabetes                   | Treatments started: to induce homeostatic return of pancreatic insulin excretion in Type-1 diabetes mellitus   | CellSonic VIPP        |
| Cancer                     | All types  | CellSonic VIPP        |
