

Keep it simple.

CellSonic VIPP only does one thing – it goes **BANG!**

It is a fast **BANG**, the fastest **BANG** in the world. This is how CellSonic VIPP is the best.

A CellSonic VIPP **BANG** does two things: it can damage and provoke; how to use it depends on the doctor.

It can damage - a stone, calcification, bone, replication of mutated cells and all types of infections. It kills germs.

It can provoke - hit nerves and the brain gets a message that the body has been attacked so the immune system is provoked into action. The threshold of the immune system is breached and the body starts its own repair by activating stem cells. This heals and removes the cause of pain.

CellSonic VIPP is non-invasive and there are no drugs so there are no side effects.

CellSonic VIPP is a new branch of medicine.

You can do a lot with it and more cures are being discovered.

CellSonic VIPP is only as good as the doctor using it.

CellSonic VIPP makes a good doctor better.

CellSonic VIPP has the lowest cost of cure.

So you cannot say you do not believe one machine can do so much. It only goes **BANG**.

It is you who can do so much with CellSonic VIPP.
